

AutoWorks

Workshop Management System

An end-to-end platform to run an automotive workshop — customers, vehicles, work orders, and invoicing in one place.

Stakeholder Demo • Phase 1 MVP

OVERVIEW

What is AutoWorks?

A modern web application that digitizes the day-to-day operations of an automotive repair workshop.

- Replaces paper job cards and spreadsheets
- Single source of truth for customers & vehicles
- Tracks every job from intake to payment
- Generates invoices automatically from completed work
- Real-time revenue & operations dashboard

UNDER THE HOOD

Architecture & Technology

Frontend

Angular 19 · Angular Material · responsive SPA

REST API

ASP.NET Core · Clean Architecture · FluentValidation

Security

ASP.NET Identity · JWT auth · role-based access

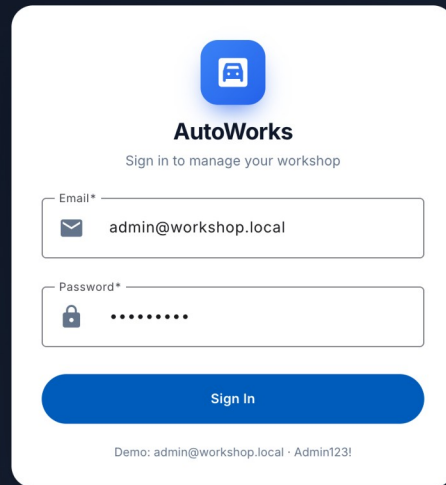

Data

Entity Framework Core · PostgreSQL 16

Secure Login

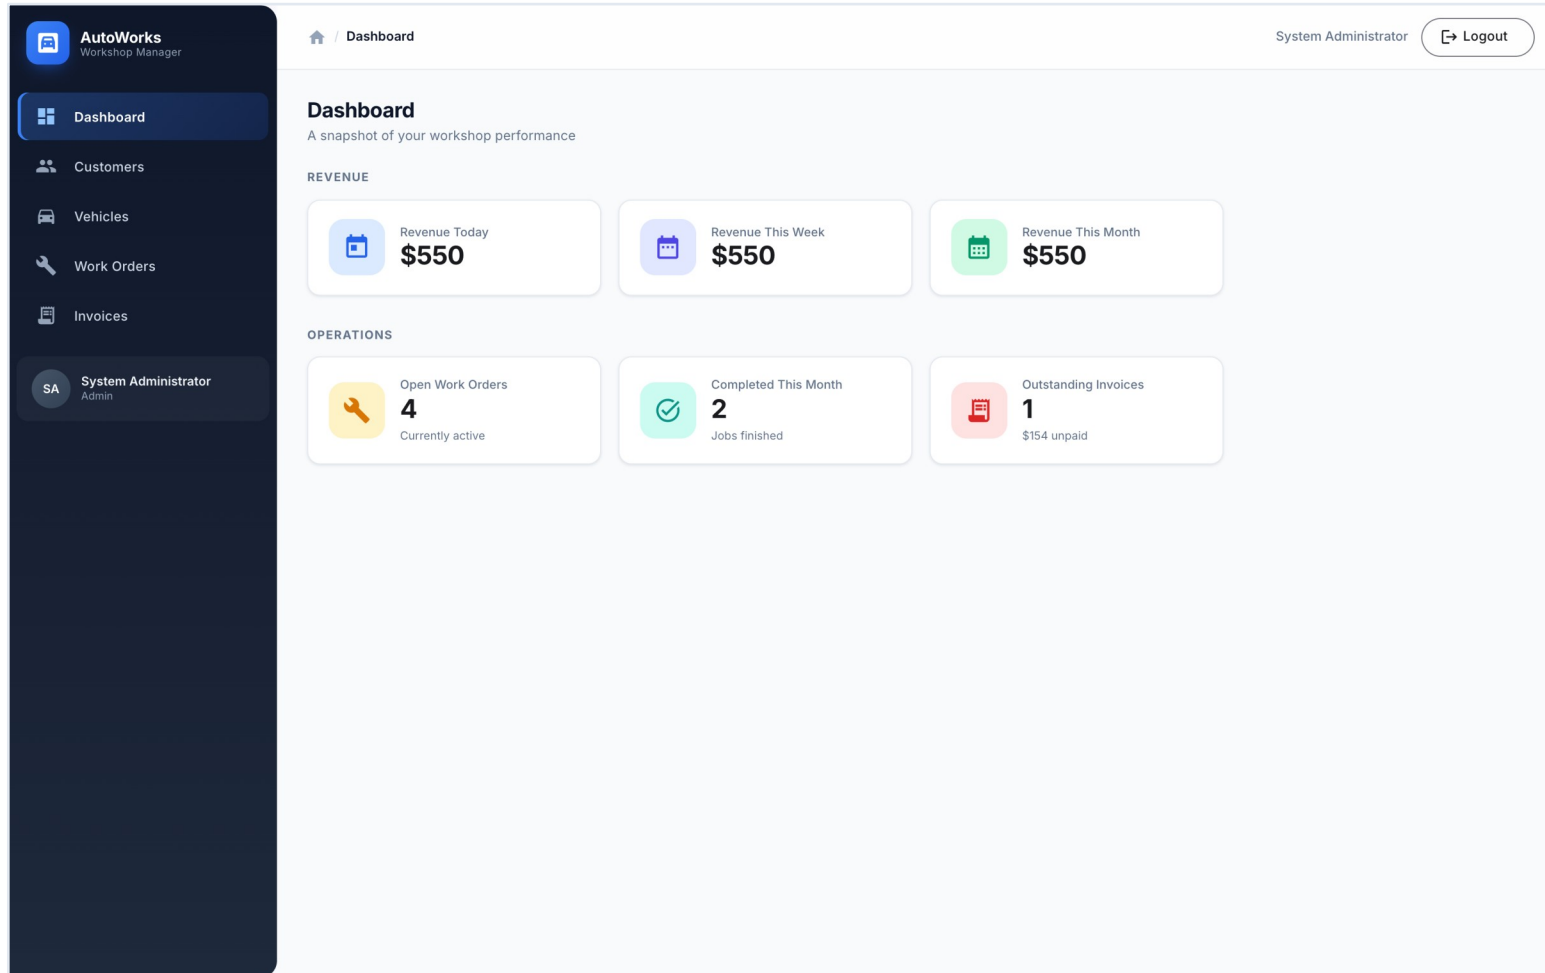

The login form is centered on a dark blue background. It features the AutoWorks logo at the top, followed by the text 'Sign in to manage your workshop'. Below this are two input fields: 'Email*' with the value 'admin@workshop.local' and 'Password*' with masked characters. A blue 'Sign In' button is positioned below the password field. At the bottom, a demo login is provided: 'Demo: admin@workshop.local · Admin123!'.

- Email + password authentication
- JWT tokens issued on sign-in
- Role-based access (Admin, Manager, Technician)
- Clean, branded entry point

Operations Dashboard

- Revenue today / this week / this month
- Open work orders in progress
- Jobs completed this month
- Outstanding (unpaid) invoice totals
- Live KPIs the moment you log in

- Track jobs from intake to completion
- Color-coded status workflow
- Filter by status
- One-click status updates
- Line-item pricing per job

Creating a Work Order

The screenshot displays the AutoWorks Workshop Manager interface. A sidebar on the left contains navigation links: Dashboard, Customers, Vehicles, Work Orders (highlighted), and Invoices. The main area shows the 'Work Orders' section with a status filter set to 'All statuses'. A 'New Work Order' modal is open, featuring the following fields:

- Customer*** (dropdown menu)
- Vehicle*** (dropdown menu)
- Line Items** section with a '+ Add item' button and a table with columns: Description*, Qty* (set to 1), and Unit Price* (set to 0).
- Customer notes** (text area)
- Estimated total** (displayed as \$0.00)

At the bottom of the modal are 'Cancel' and 'Create Work Order' buttons. In the background, a table of existing work orders is visible, including columns for ORDER #, TOTAL, OPENED, and Status.

- Pick customer, then their vehicle
- Add unlimited service line items
- Live estimated total as you type
- Capture customer notes
- Fast, validated data entry

INV-DEMO-0002	David Lee	Sent	\$153.98	May 31, 2026	Jun 14, 2026	Status

- Generate invoices from completed jobs
- Automatic tax calculation
- Status lifecycle: Draft → Sent → Paid
- Track due dates & outstanding balances

DELIVERABLE

Invoice Document

A print-ready invoice generated automatically from work-order data — branded, itemized, with tax and totals.

- Customer & vehicle details
- Itemized lines, subtotal, tax, total
- Payment status & due dates
- One-click generation from a completed job

The real PDF is embedded in this slide — double-click the invoice to open it.
